[>> See for yourself](#)

Pre-Assembled and Ready to Install

Just send us your specifications/dimensions and [we pre-assemble standard parts ready for you to install](#). Cutting to length, drilling, thread cutting, milling, keyway broaching and much more, everything within a very short time.

[Precision shafts](#) too can be processed according to your specifications.

What Would the World be Without Drive Elements?

Necessity is the mother of invention and therefore drive elements with their excellent performance provide invaluable services in special situations. This is also true for applications such as [“tank cleaning”](#), where a bevel gear set by Nozag supports this simple invention, or in [works of art](#).

Do you have any ideas in mind for drive applications? Nozag provides the necessary components and [the engineering](#).
