

July 2018

The interplay of design, art, pleasure and technology

Thanks to an ideally designed ratio from the control wheel to the swivel wheel, you can gently pour wine from large and small bottles into your wine glass. The design object of a decanting machine relies on drive elements from Nozag.

New, more informative, more compact, more mobile – website nozag.ch

The Nozag website has a new design, is even more clearly structured and packed with products and information. We have incorporated many customer suggestions and offer you even more knowledge about drive technology - online 24 hours a day.

Summer holidays – always there for you

Summer - time for a break and rest. We'll treat you to that! For those who don't take a holiday in July and August, we don't make any either and are always ready for your wishes and projects. We wish all others a relaxing holiday.

Drive components from Nozag – product range extract

In addition to finished gearboxes and drives, you will also find a wide range of standard parts, which can be work on, ready to install. We are also happy to develop and produce custom-made products for you.
