Nozag solves your drive and gearing requirements

Also this year we shall keep you up to date with news and interesting facts about drive technology. We shall provide you with inspiration through [products](#) and [application situations](#) in order to be able to solve your challenges with the high-precision [gearing parts](#) and [drive components](#), as single parts or combined.

Nozag is at your disposal at any time for consulting, development and engineering in the field of drive technology. We are looking forward to be challenged by you.

Quick and easy to standard sprockets or custom-made individual components

Whether standard or tailor-made sprockets Nozag offers both. From steel with increased wear resistance, to plastic and stainless steel - suitable for use with food and chemicals – they are available at our's in one to three rows. From single pieces for revisions to small or large series, Nozag offers fast service, also for [individual adaptations](#). Of course we can also provide you with the [suitable chain](#).

Connecting shafts KN for convenient drive transmissions

In drive technology, distances can be bridged very elegantly using connecting shafts. The newly designed connecting shaft KN, a combination of previous models, can be installed very quickly and easily. In addition, it can be optimally combined with pillow blocks if the length makes this necessary. Tell us your required torque and the connection dimensions and you will receive the ready-to-use connecting shaft.

Drive Components from Nozag - Extract from the Product Range

In addition to complete gearboxes and drives, you will also find a wide range of standard parts, which we also further process ready for installation. We are also happy to develop and produce special designs for you.
