Our newsletter wants to encourage you to find own solution approaches for your technical drive applications. We will support you with our over 50 years of experience in drive technology, individual advice or [standard drive components](#). Challenge us!

[Stack lowering – a drive example, when emergency becomes reality.](#)

### The perfect “emergency solution”

Stacks mounted on top of an industrial building must be laid down for technical safety reasons and raised within a specified period of time in the event of an emergency. A challenge for the drive technology, solved thanks to the decisive input and the drive components of Nozag.
