Step by step with the screw jack configurator

Specialists and experts have now the possibility to configure their screw jack online. The configurator supports you! Step after step, you define your key data and the configurator, using an elimination process, selects for you the available combination possibilities. This will allow you to find your screw jack in a more efficient and direct way. The configurator will in parallel create the corresponding parts list to get directly a quote from Nozag. Very simply – online!
