

Explosive drive situations? Nozag solves them safely!

Does your production include potentially explosive situations? Then it is recommended to provide for ATEX-compliant drive units already during project planning. Nozag offers special protected screw jacks that meet all your requirements and the ATEX regulations for equipment group II category 3 (zones 2/22). We will also find, jointly with you, a customized solution for category 2 (zone 1/21) applications. Thanks to its extensive experience with ATEX products that have been operated successfully for many years in such situations, Nozag will ensure the reliability of your production.

Describe us your situation and requirements – we have the drive solution.

Versatile screw jacks, also with ATEX protection

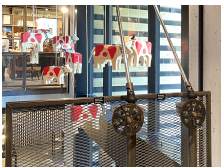

Screw jacks in non-rotating or rotating version are versatile. They can also be used in explosive environments, as they meet the requirements of the ATEX Directives 2014/34/UE. They will increase the safety of persons, but also the safety of the production process in hazardous areas. Whatever the size, the power transmission and the ATEX requirements, our ATEX checklist will allow you to find the right solution.

Modular system to move Swiss wooden cows

They are well known, the colorful wooden cows in Swiss style. You can also marvel at them in the Trauffer World of Experiences. Nozag worm gears and bevel gears allow actuating the large "cow mobile", which visitors can set in motion themselves. A simple, silent and low-maintenance solution, as required by the responsible engineering office Ingenieurbüro Bratschi and Grimsel Hydro.
