

T series

EXCELLENCE IN PERFORMANCE

2.3 T SERIES

Advantages

- zero-backlash reduction gear
- high moment capacity
- excellent positioning accuracy and positioning repeatability
- high torsional and tilting stiffness
- small dimensions and weight
- high reduction ratios
- long lifetime
- easy assembly

The **T series** represents a wide range of TwinSpin® high precision reduction gears with a cylindrical shaped case. The T series high precision reduction gears comprise an accurate reduction mechanism and a high-capacity radial and axial cylindrical roller bearings. This design of reduction gears allows the mounting of the load directly on the output flange or the case without the need of additional bearings. The T series high precision reduction gears are characterized by a modular design, which allows the mounting of your desirable type of motor to the reduction gear by means of a motor connection flange. The T series includes TwinSpin® high precision reduction gears that are not completely sealed; an inlet flange and a gasket kit have to be used for the sealing. Upon the customer's request, SPINEA is able to supply a completely sealed reduction gear with a flange according to the customer's motor.

Tab. 2.3a: T series features

Case	a) TB- threaded holes in the case 1) b) TC- threaded and through holes in case 2
Input flange connection	The shaft sealing / adapter flange is offered in the following versions: a) motor connection flange b) sealed input cover c) without a flange
Input shaft design	The input shaft is offered in the following versions: a) shaft with a keyway b) according to a special request
Installation and operation characteristics	A wider range of modular configurations

1) Valid for TS 60, TS 70, TS 80, TS 110, TS 140

2) Valid for TS 170, TS 200, TS 240, TS 300

Tab. 2.3b: T series ordering specifications

TS - 200 - 125 - TC - P24					
Name	Size	Ratio	Series version	Shaft version

RIGHT TO CHANGE WITHOUT PRIOR NOTICE RESERVED

- 1) Mean statistical value. For further information see chapter Torsional stiffness, Tilting stiffness.
- 2) Load at output speed 15 rpm.
- 3) Moment M_{c max} value for F_a=0, If F_a≠0, see chapter 3.5.
- 4) Axial force F_{a max} value for M_c=0, If M_c≠0, see chapter 3.5.
- 5) The parameter depends on the version of the high precision reduction gear.
- 6) The parameter depends on the version of the high precision reduction gear, ratio and lost motion.
- 7) The values of the parameters are informative. The exact value depends on the specific version of the high precision reduction gear.
- 8) Temperatures of the high precision reduction gear lower than 20°C will cause higher no-load starting or back driving torque.
- 9) Instantaneous speed peak that may occur within the working cycle.

IMPORTANT NOTES:

- Instantaneous speed peak that may occur within the working cycle.
- Note please the temperature on the gear case that should not exceed significantly 60°C degrees.
- Load values in the table are valid for the nominal life of L₁₀ = 6 000 [Hrs].
- High precision reduction gears are preferred for intermittent cycles (S3-S8); the output speed in applications is inverted-variable. The continuous mode cycle (S1) is needed to be consulted with the manufacturer.
- Dimensional pictures of the T series reduction gears are listed in the catalogue without sealing.
- Sealing options are described in the chapter Assembly instructions.
- Please consult the maximum speed in a duty cycle with the manufacturer.
- The values in the table refer to the nominal operating temperature.

The ratios highlighted in bold are recommended by SPINEA as optimal versions in terms of price and delivery.

Drawings

TS 60 - i - TB - P6

INPUT SIDE VIEW

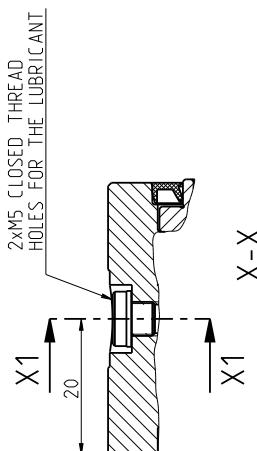

This technical drawing provides a detailed cross-sectional view of a mechanical component, specifically section A-A. The drawing includes various dimensions, feature descriptions, and material notes.

Dimensions:

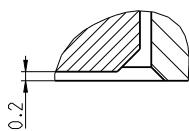

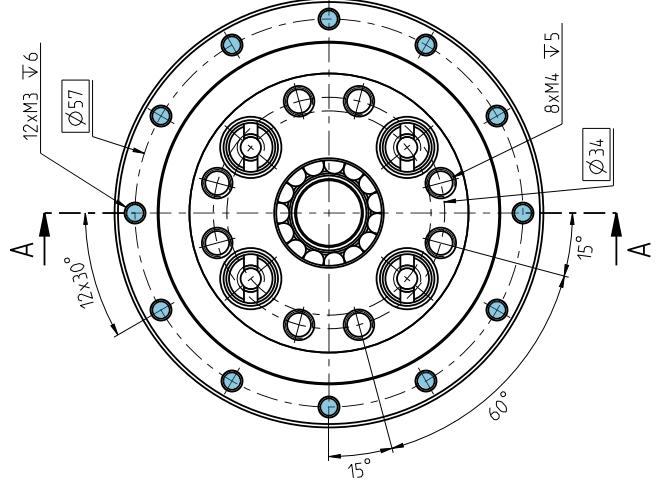

- Outer width: $\phi 63 \text{ HT}$
- Outer height: $\phi 63 \text{ HT}$
- Top horizontal distance: $0.5 \times 45^\circ$
- Bottom horizontal distance: $0.5 \times 45^\circ$
- Top center hole diameter: $\phi 41 \text{ H11}$
- Top center hole depth: 2.5 ± 0.3
- Top center hole side clearance: $\phi 10$
- Top center hole side clearance height: $\phi 15.5 \text{ HT}$
- Top side hole diameter: $\phi 11 \text{ H8}$
- Top side hole depth: 15.5
- Bottom side hole diameter: $\phi 11 \text{ H8}$
- Bottom side hole depth: 15.5
- Bottom center hole diameter: $\phi 28.1$
- Bottom center hole depth: 4.0 ± 0.1 (Total height: (50.05))
- Bottom side hole distance from bottom: 9.55
- Bottom side hole distance from top: 13
- Bottom side hole distance from center: 13
- Bottom side hole distance from left edge: 0.5
- Bottom side hole distance from right edge: 0.5
- Total height: 13
- Left side note: *Poznanka / See Note*
- Right side note: *Poznanka / See Note*
- Bottom note: *Technological Holes*

Notes:

- A dimension of $2\phi 3$ is indicated near the top right, labeled "Technological Holes".
- Section A-A is indicated by a leader line pointing to the right.
- Material notes: $2\phi 9$ at the top, 15° at the top left, and 15° at the bottom left.
