

H series

EXCELLENCE IN POSITIONING

2.5 H SERIES

Advantages

- **large input shaft hole diameter**
- **fully sealed**
- **zero-backlash reduction gears**
- **high moment capacity**
- **excellent positioning accuracy and positioning repeatability**
- **high torsional and tilting stiffness**
- **small dimensions and weight**
- **high reduction ratios**
- **high efficiency**
- **long lifetime**
- **easy assembly**

The **H series** represents TwinSpin® high precision reduction gears with through-holes in the shafts, also known as the hollow-shaft version. Cables, tubes with compressed air, drive shafts etc. can be led through the hole in the shaft of the gear. The H series is completely sealed and filled with grease for lifetime. The H series high precision reduction gears comprise an accurate reduction mechanism and high-capacity radial and axial cylindrical bearings. This design of the reduction gears allows the mounting of the load directly on the output flange or case without a need of additional bearings.

Tab. 2.5a: H series features

Case	Threaded and through holes in the case
Input flange connection	Completely sealed reduction gear
Input shaft design*	The input shaft is offered in the following versions: a) hollow shaft b) according to a special request
Installation and operation characteristics	Hollow-shaft reduction gears. A large hole in the input shaft allows cables, tubes or an additional shaft to pass through the reduction gear. Suitable for applications where the rotation of the input shaft is achieved by using a tooth belt or a similar arrangement.

*On request

Tab. 2.5b: H series ordering specifications

TS - 200 - 125 - H - H52					
Name	Size	Ratio	Series version	Shaft version	
				H	S ¹⁾
TS	70	75	H	13	•
	140	69, 115	H	36	•
	170	69, 125	H	42, 46	•
	200	63, 125	H	52, 56	•
	220	55, 125	H	62, 65	•

Note: An example of an ordering code of a modified H series TwinSpin® reduction gear with a motor flange:

TS200 - 125 -H- H56 - M235 - P231. The markings M235 and P231 for a specific modification are defined by the manufacturer.

RIGHT TO CHANGE WITHOUT PRIOR NOTICE RESERVED

- 1) Mean statistical value. For further information see chapter Torsional stiffness, Tilting stiffness.
- 2) Load at output speed 15 rpm.
- 3) Moment M_{c max} value for F_a=0. If F_a ≠ 0, see chapter 3.5.
- 4) Axial force F_{a max} value for M_c=0. If M_c ≠ 0, see chapter 3.5.
- 5) The parameter depends on the version of the high precision reduction gear.
- 6) The parameter depends on the version of the high precision reduction gear, ratio and lost motion.
- 7) The values of the parameters are informative. The exact value depends on the specific version of the high precision reduction gear.
- 8) Temperatures of the high precision reduction gear lower than 20°C will cause higher no-load starting or back driving torque.
- 9) Instantaneous speed peak that may occur within the working cycle.

Tab. 2.5c: H series rating table - continued

Size	Reduction ratio	Max. lost motion	Average angular transmission error 1) 6)	Hysteresis	Max. moment 2) 5)	Rated radial force 2)	Max. axial force 2) 4)	Input inertia 7)	Weight 7)
	i								
TS 70	75	<1.5	±30	<1.5	142	2.8	4.1	0.061	1
TS 140	69 115	<1.5	±17	<1.0	1160	11.5	17	3.6	7.5
TS 170	69 125	<1.0	±17	<1.0	2 000	19.2	27.9	4.8	11.6
	69 125	<1.0	±15	<1.0	3 300	21.5	31.7	18.2	20
TS 220	55 125	<1.0	±15	<1.0	4 400	22.5	35.5	31	26

IMPORTANT NOTES:

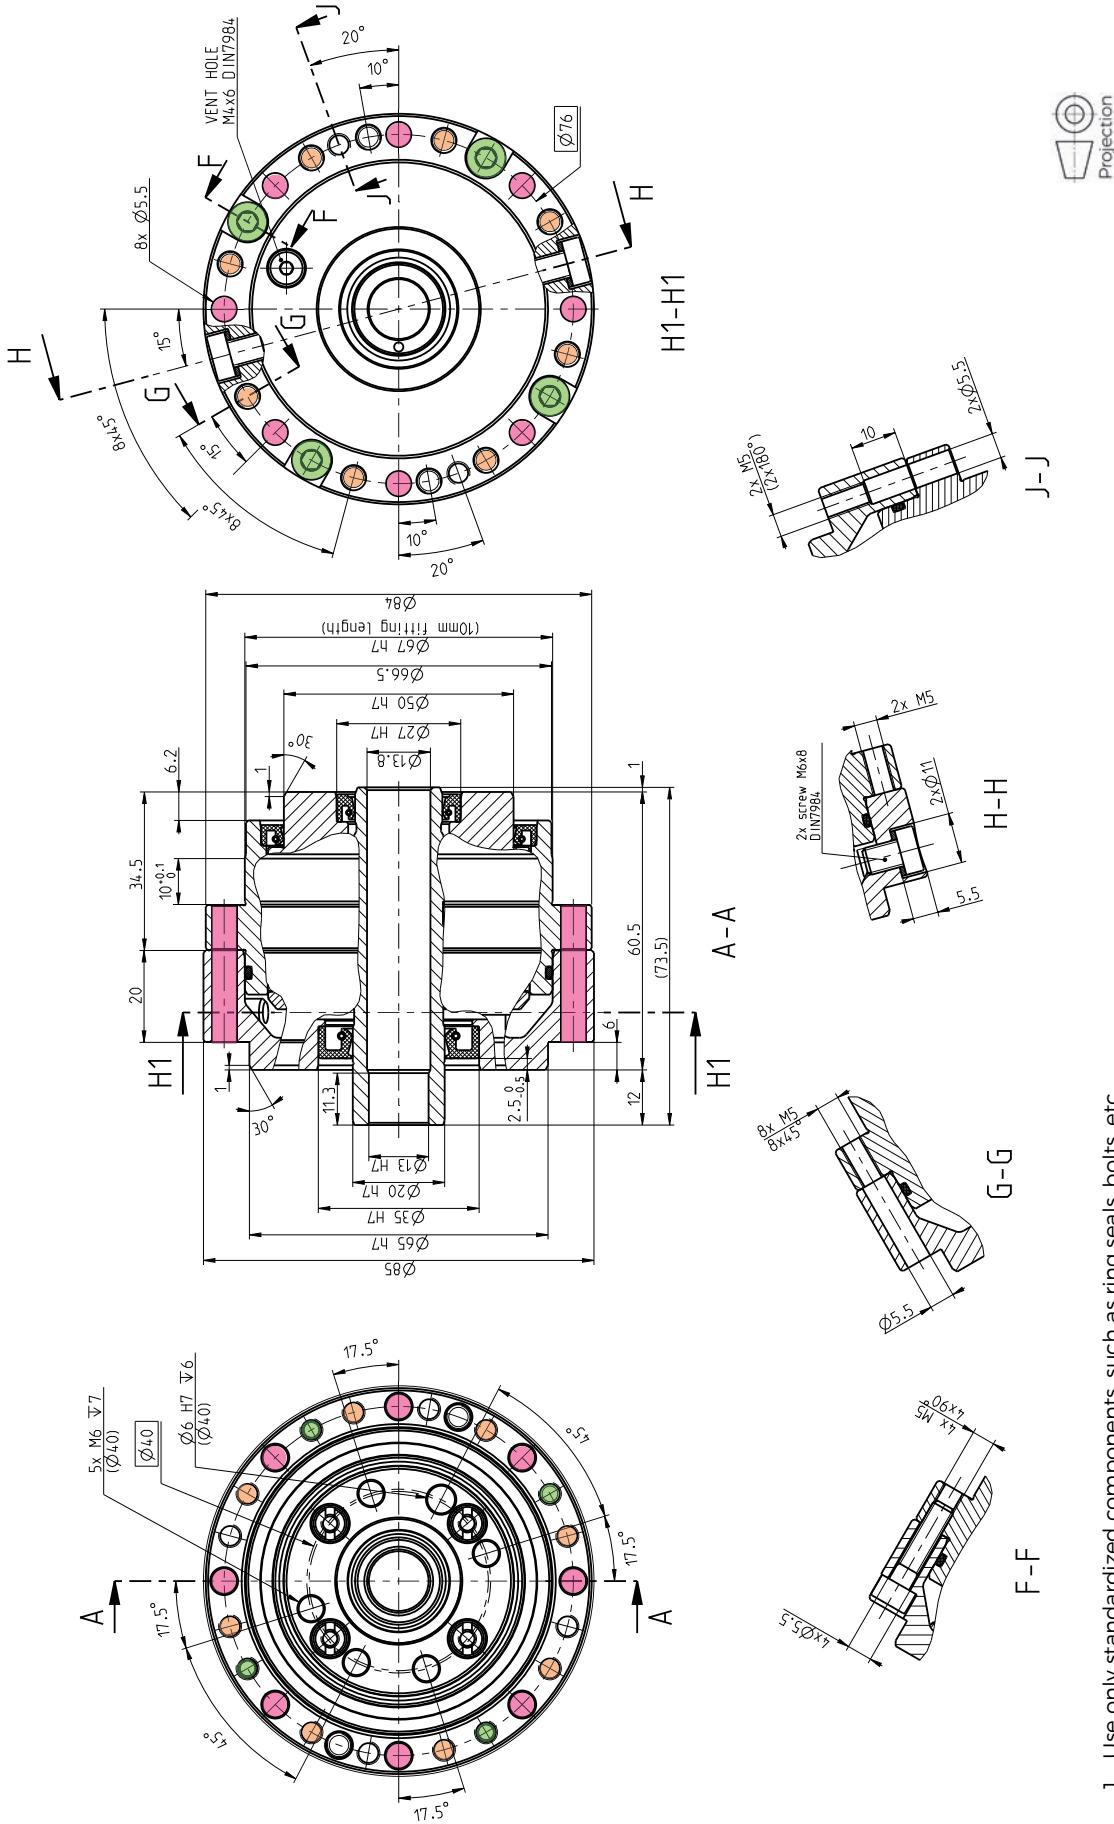

- Instantaneous speed peak that may occur within the working cycle.
- Note please the temperature on the gear case that should not exceed significantly 60°C degrees.
- Load values in the table are valid for the nominal life of $L_{10} = 6\,000$ [Hrs].
- High precision reduction gears are preferred for intermittent cycles (S3-S8); the output speed in applications is inverted-variable. The continuous mode cycle (S1) is needed to be consulted with the manufacturer.
- Please consult the maximum speed in a duty cycle with the manufacturer.
- The values in the table refer to the nominal operating temperature.

The ratios highlighted in bold are recommended by SPINEA as optimal versions in terms of price and delivery.
