

Drives for Everyday Use

In our daily lives, we take it for granted that everything is convenient, easy to use and working smoothly. We often forget that many of these useful objects are equipped with drives. We encounter such innovative, intelligent and individual drive technology several times each day. Good to know that as a designer and manufacturer of such everyday objects, you can rely on a partner like Nozag that understands your needs and has solutions.

From Morning till Night - Surrounded by Nozag

The day barely started, we are pampered with hot coffee from the coffeemaker. The machine uses a screw jack to obtain the necessary water pressure. By the way, a Nozag manufactured drive component has led an industrial coffeemaker to a world record.

During your day, you will encounter the most diverse drive elements in buses, trains or in your electric bike. Maybe you are passing through automatic doors and dump your coffee cup into the garbage disposal. We would be happy to demonstrate to you an example of a most recent application in the area of waste disposal.

Those working in industry come across a large variety of drive systems provided by Nozag. Be it for the machinery and equipment engineering, for the micro or food industries, we are ready to fulfil your requirements in terms of materials and technology. You'd like some examples? some examples?

You have visions and requirements? We develop and realize them for you.

You know what your customers require, or the new product you want to bring to the market. Nozag supports you in your endeavour. We offer our know-how and develop

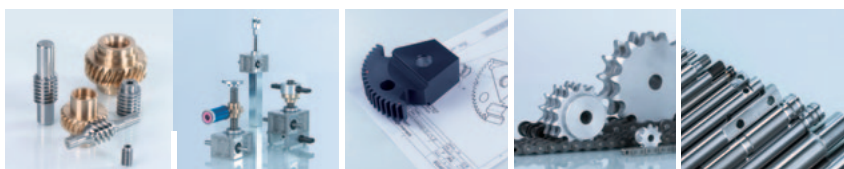

the appropriate drive system together with you. Talk to us, show us your plans - and your visions become reality - thanks to pre-finished drive components from Nozag.

You deserve more summer spirit!

So far, this summer has let us down. You deserve better. Invite us to a meeting, tell us about your vision and we'll provide you with reasons to recoup some of the summer you missed. We offer to "recoup your sunshine balance."

Drive Components by Nozag – Examples from our Product Catalogue

Relax on Cloud Nine!

Jacuzzi and sundeck – A touch of a button and everything moves automatically and appears in the latest design and without any visible drive. Your job is to bring the sun outdoors. Have a look>>
