## Drive Technology Supports Lean Manufacturing

Economic efficiency combined with safe and healthy working conditions for the staff. The philosophy of our LEAN production is to provide facilities and equipment that make work easier thanks to drive technology. Nozag has already optimized [various equipment](#) with simple drive components. Benefit from our extensive know-how!

### Nozag Creates Transparency

To help you find answers and contact persons even faster, we have developed 5 areas of expertise.

#### Standard Program

8000 standard gear wheels and standard chains available form stock - since 50 years

[>>more](#)

#### Tailor Made

Standard components machined as ready to install - within a short time [>>more](#)

#### Customised Components

Components manufactured according to your drawing - if required designed by Nozag [>>more](#)

#### Standard Drives/System

Easy moving of loads up to 10 tons - by means of standard screw jacks and standard bevel gearboxes [>>more](#)

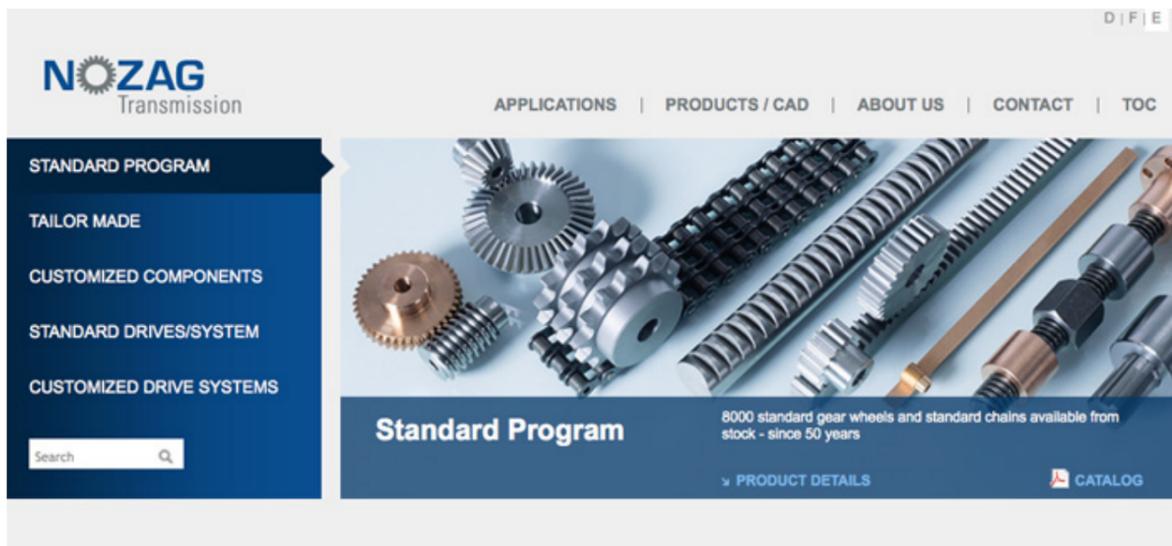

#### Customized Drive Systems

Rotating, lifting and tilting movements by using the optimized gearing geometry - designed for you and supplied as one unit [>>more](#)

### Nozag Website with more Information

We continually develop and improve our website so you can find even more detailed information about our service areas, [products](#) and [applications](#)! Check it out! – [www.nozag.ch](http://www.nozag.ch)

### You can find us at various trade fairs

Visit us and find out about innovations and new products at the following venues:

#### «All About Automation» Trade Show at Friedrichshafen – 7-8 June 2016

South Germany's Automation Fair for Users [>>more](#)

#### Swisstech 2016 at Basel – 15-18 November 2016

International Fair for Materials, Components and System Assembly [>>more](#)

We look forward to seeing you at our booth.
