

Drive Technology with Vision – Moving Forward Together in 2026

Thank you for your trust, your interest, and the open dialogue throughout the past year. 2025 brought its share of challenges, yet these very moments pushed us at Nozag Drive Technology to evolve: strengthening our technical expertise, deepening our early involvement in customer projects, and delivering solutions that are both reliable and sustainable.

As we enter 2026, we are motivated and optimistic. Drive technology continues to advance at high speed, and we are excited about the ideas, projects, and challenges that engineers, planners, and designers will bring to the table. Whether you rely on proven standard components or require tailored system solutions such as screw jack systems, our engineering team stands ready — with expertise, curiosity, and genuine passion — to help you identify the right drive solution.

Let's shape the coming year together and turn innovative thinking into measurable progress.

The Nozag team

First Name or Last Name – Whatever Feels Right to You

At Nozag, closeness and accessibility shape the way we work every day. We value short distances, open communication, and a barrier free exchange from the very first interaction — whether it's an initial project discussion, ongoing collaboration, or regular contact. That's why we say: using first names is welcome. And so is a more formal form of address.

If you prefer a more informal tone, you are welcome to address us by first name — and we will gladly do the same. If you feel more comfortable keeping things formal, please continue to address us that way. Both ways are perfectly appreciated. What matters to us is mutual respect, open dialogue, and a partnership built on equality.

So choose the form of address that feels right to you in your next interaction with us. Our commitment, dedication, and high standards for reliable solutions remain unchanged.

>> We look forward to staying in regular contact with you.

Drive components from Nozag – range overview

Screw jack, 2-100kN

Modular screw jack system

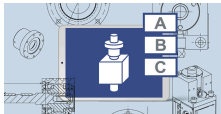

Bevel gearboxes, $n=3,600\text{min}^{-1}$

Worm gears, $i=6.76-2700$

Nozag always offers added value and additional service

Configurator NSE – Assemble screw jacks simply and directly
